How the Smart Practice List Works
Better Practice is powered by a smart engine using a proven learning method called Spaced Repetition. Basically, this means Better Practice organizes your teacher’s assignments for you for the most efficient learning. Numerous studies have shown that spaced repetition is the best for long-term retention – so you don’t forget your songs and skills. So you can learn faster with less practice!

Better Practice is A Game Changer
Practicing well is hard! I have a degree in music and I can tell you – most music students, even at that level, do not know how to practice well or efficiently. Of course, you’re learning new pieces all the time and you have your own way of doing that. But what about maintaining repertoire? Learning technical skills faster and keeping them fresh? Measurably tracking improvement? How do you compare to others? Traditional practice cannot compare to a modern tool like Better Practice.

You want to get the most out of every lesson and retain the knowledge, right? With Better Practice, everything you learn (with all the teacher’s notes and tools attached) is kept in the app. Whenever you practice, the duration is logged and analyzed - along with how well that practice went. This means you get measurable results on your improvement and it intelligently guides you to where you need more work.

Practicing has never been easier or more effective. With Better Practice, it’s also more fun. You can also see how much others are practicing and see if you can beat them! Getting started is simple, so start practicing better today!

It’s important to rate yourself in order for your practice to be logged!
